

Digital Teaching & Learning

The profile of a Wasatch County School District graduate is a student who prepared to be successful and beneficial in their communities.

They are students who are proficient in both literacy and numeracy and have a passion to be life long learners. They have efficacy in their ability to accomplish their goals.

We believe that technology helps facilitate our mission to have all students to achieve at high levels.

Our digital initiative rests on three pillars;

1

DIGITAL CITIZENSHIP

Using information technology to engage in the world around us

2

21ST CENTURY SKILLS

Knowledge, skills and dispositions to be successful in the 21st century

3

PERSONALIZED LEARNING

Tailored instruction to meet the needs of all learners

What parents need to know about their student's devices

Device Filtering at Home

The district installs and maintains an internet filtering software solution on all student devices in the district. This software solution is intended to block student access to all harmful and inappropriate websites and web-based content.

This solution is in effect on the student device no matter the location of or the connection used by the student to access the internet. While no solution is guaranteed to deny access to all such websites, the use of filtering software helps make internet use by students much safer.

Parents are encouraged to use ScreenGuide, which is provided by the school district. ScreenGuide will give parents the ability to designate the amount of time the iPad can be used at home, and control which apps can be used during non-school hours.

Device Care

Your student's device is an important tool used in their learning. Much of their curriculum and assessments will be done with the device.

It is expected that students will be responsible in the care of their device.

Screen breakage and keyboard damage will be charged on a set schedule. Costs for repairs and replacement will be as follows:

- iPad replacement (total device lost) **\$294**
- iPad repair for physical damage **\$249**
- Power Adapter **\$19**
- Power Cable **\$19**
- Keyboard or Case replacement **\$56**
- Logitech Crayon (stylus) **\$44**

WCSD provides an Accidental Damage Protection on all student devices, which covers damage of an accidental nature. **see parent handbook on the district website.*

APPS

Students will not be able to download apps on their device that have not been approved by WCSD for an educational purpose. All student information is protected according to Federal and State privacy laws.
